Time off
working
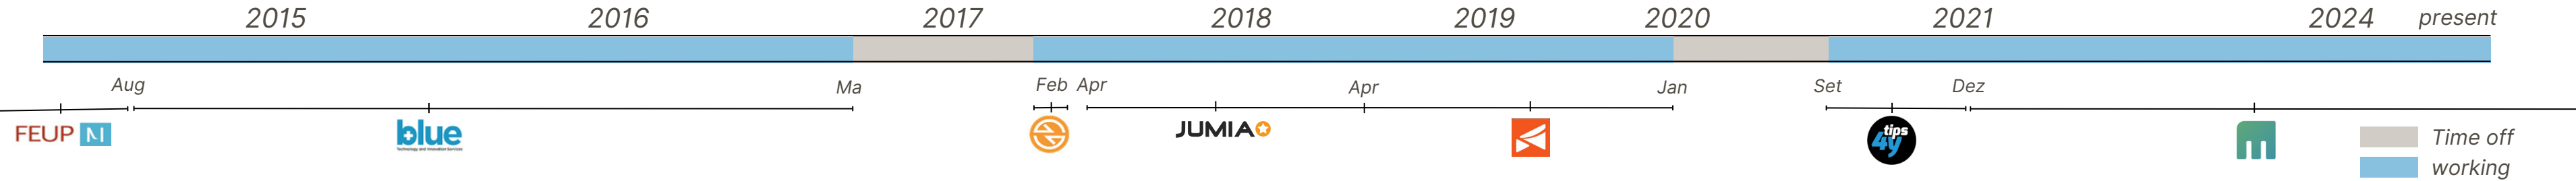

FE MANAGER (Sep 21 - May 24)
Mammoth Analytics

- Led a team of 4 frontend developers, focusing on motivation, growth, and collaboration.
- Recruited and mentored engineers, specializing in Vue.js to strengthen the team's technical skills.
- Acted as a bridge between Design, Backend, CPO, and CEO, ensuring alignment from ideation through delivery.
- Collaborated closely with the QA team to streamline progress and improve product quality.
- Built and organized backlogs, sprints, and roadmaps using SCRUM, creating a clear project structure, and significantly contributing for the team's focus
- Established API protocols with the backend, significantly highlighting and reducing security and performance issues
- Significantly reduced onboarding time in the company from Months to a couple of weeks

LEAD FE DEV (Dez 20 - Sep 21)
Mammoth Analytics

- Shared expertise in Vue.js, guiding the team in adopting best practices and transitioning from AngularJS to Vue.
- Led the migration of a complex AngularJS application to Vue.js, significantly improving user experience AND developer experience, reducing build time by 10x.
- Trained and mentored ~8 team members in Vue, enhancing overall skill levels and team cohesion, contributing for their promotion within the company
- Structured the frontend architecture for scalability and ease of maintenance and leveraged code reviews, assuring a way easier integration for newcomers to the company
- Defined and assigned tasks for the team, fostering efficient project workflows
- Successfully implemented a DSM, significantly improving design consistency and development efficiency which was a major problem

LEAD FE DEV (Aug 20 - Nov 20)
Tips4y

- Leveraged extensive Vue.js expertise to guide and mentor a team of 4 developers, promoting best practices and team cohesion.
- Led the team to deliver key projects on a tight timeline for crucial clients, ensuring quality and timely completion through effective collaboration.
- Conducted interviews for Vue.js developers to expand the team, strengthening the skill set and capacity.
- Acted as a liaison between development and project management, enhancing communication and aligning goals.
- Collaborated closely with company leadership (CEO) on management decisions and team structure, contributing strategic insights.
- Shared knowledge on personal and professional development to foster a productive and supportive work environment.

LEAD FE DEV (Apr 18 - Dec 19)
[Last UI built for the company](#)

- Led all frontend development and maintenance, ensuring responsive, cross-browser compatibility and high performance across devices.
- Rebuilt the platform twice, optimizing code and structure to support scalability and enhanced user experience.
- Mentored an intern in Vue.js and frontend development, fostering both technical skills and professional growth.
- Developed a responsive, interactive platform that supported nearly €1,000,000 in user wagers prior to the next major release, highly contributing to the company's revenue with minimal support tickets being raised for fixes in the platform

JUMIA★ FE DEV (Apr 17 - Apr 18)
[Jumia package tracking page](#)

- Worked with UI/UX producing a new UI for the company's tracking page that resulted in significant improvement in user retention.
- Delivered consistent design updates based on A/B testing results, optimizing for both desktop and mobile users.
- Improved efficiency on an internal platform for package processing
- Worked under a good Agile SCRUM oriented team

JUNIOR FE DEV (Feb 17 - Apr 17)
Fullsix

- (2 months isolated job) develop interfaces for a big portuguese Electricity Company (EDP)
- Significantly improved javascript skills
- HTML , CSS and javascript

blue FULLSTACK (Aug 14 - Jun 16)
Positive blue

- Developed features of the CRM.
- Create a commercial flow of expenses management and a users' profile and interaction dashboard
- Vue JS, laravel, git, Scrum, MySql, Spring, hibernate
